This Memorandum of Understanding has been made and agreed upon between the parties mentioned below, signed on **08-05-2023** by and between the following two entities collectively referred to as "**Parties**" and each referred to individually as "**Party**".

Avanthi Institute Of Pharmaceutical Sciences, here in after referred as **AIPS** Cherukpally, Near Tagarapuvalasa, Vizianagaram District, Andhra Pradesh -531162 (A.P) represented by AIPS after called as "**First Party** "which expression shall, where the context so admits, be deemed to include its successors, executors and administrators of the **FIRST PARTY**

Avanthi Institute Of Pharmaceutical Sciences was established in 2005, this constituent college is a prestigious institution located in a multilevel building with well-equipped research laboratories and good research facilities to meet the global needs. We actively seek students who best personify our core values innovation, leadership, excellence, integrity, respect and professionalism. The institution offers B.Pharm, M. Pharm (Pharmaceutics & Pharmaceutical Analysis) and Pharm.D. The college is recognized by Government of AP and Affiliated to JNTU vizianagaram. The Undergraduate and Post Graduate degree programmes are approved by the Pharmacy Council of India (PCI) and All India Council for Technical Education (AICTE), New Delhi.

AND

SRI SAI ADITYA HOSPITAL was established in the year 2013 Andhra Pradesh hereafter referred as **SRI SAI ADITYA HOSPITAL**, in Dondaparthu, Visakhapatnam called as "**Second Party**" is a top player in the category Hospitals in the Andhra Pradesh. It is a 100 bedded Multispecialty Hospital, established to provide affordable, quality and excellent health care services to the citizens of Visakhapatnam. Hospital is Located within 1 KM radius from the Railway station and RTC Complex, the hospital is very easily accessible not only to the citizens of the city but also to personnel visiting Visakhapatnam to seek medical services. To achieve this every care is taken to deploy the best Ethical Standards in Medical Practice."

Now it is hereby mutually agreed amongst both parties to this MoU and bind themselves to the terms and conditions enumerated in succeeding paragraphs/Annexure A

1. Purpose:

Both AIPS and **SRI SAI ADITYA HOSPITAL** have evaluated and considered its feasibility and agreed in rendering collaborations for the purpose of further enhancement of various activities such as

1. Training activities for students in the areas like Hospital management Administration, clinical pharmacy etc.,
2. Placements for AIPS eligible students.
3. Internships for Pharm. D students.
4. Joint Collaborative Research works and publications in the areas like Clinical Research, Drug Safety monitoring, Toxicological studies and Pharmacovigilance etc.
5. Knowledge sharing sessions from both the parties.

2. Scope:

a. By virtue of this Agreement, other than **Avanthi Institute Of Pharmaceutical Sciences** and **SRI SAI ADITYA HOSPITAL**, no third party shall lay claim over the agreed activities.

b. **Avanthi Institute Of Pharmaceutical Sciences** shall render all assistance in engaging and will deploy its personnel as may be required for achieving the ends of this agreement at the discretion of the Principles-AIPS.

3. **SRI SAI ADITYA HOSPITAL** shall engage its resources and infrastructure for training and placement activities as may be required for achieving the ends of this agreement at the discretion of the Principles- **SRI SAI ADITYA HOSPITAL** Roles and Responsibility

MEMORANDUM OF UNDERSTANDING

This Memorandum of Understanding (MoU) is made and entered into on this

28th day of April, 2023

Between

Avanthi Institute of Pharmaceutical Sciences (AIPS) is an established Pharmaceutical Science college affiliated to Jawaharlal Nehru Technological University, Kakinada and also approved by All India Council for Technology Education (AICTE) and Pharmacy Council of India (PCI). It provides pharmacy education in various streams hereinafter referred to as "AIPS" which expression shall, where the context so admits, include its successors and permitted assigns, of the First Party.

And

Novel Patent Services Pvt. Ltd. (NPS) having its office at Plot # 47, Sai Priya Layout, Opp.IIM-Vizag Road, Gambheeram, Anandapuram, Visakhapatnam - 531163, India is a top notch and the only fully established Intellectual Property Rights Academy offering a complete range of Intellectual Property Right education and outsourced services including high-end research and analytics services, hereinafter referred to as "NPS" which expression shall where the context so admits include its successors and permitted assigns, of the second party.

AIPS and NPS are hereinafter individually referred to as "Party" and collectively referred to as "Parties".

1. Preamble

1.1 Whereas, AIPS, primary responsibility is to facilitate engineering education that embraces research and development of several projects during the course. Whereas, NPS primarily focuses on educating peers on Intellectual Property Rights, developing IP strategy and providing a collaborative platform in between academia, industry and investors.

1.2 The Parties hereby express their willingness to establish and support an Intellectual Property Cell (IPR Cell) within the premises of AIPS.

PRINCIPAL

2. Scope of MoU

The two Parties have decided to enter into the Memorandum of Understanding to jointly work on the following activities:

2.1 AIPS

2.1.1 Shall establish and promote IPR Cell and its activities in the premises of the College of Engineering.

2.1.2 Shall provide an infra-structure i.e., a physical space with projector, all the required facilities for conducting training and mentoring sessions regularly in IPR cell.

2.1.3 Shall engage solely with NPS in any of the IP related requirements.

2.1.4 Shall connect any project, thesis or research works of AIPS to the IPR Cell, whereby all the workable projects can be adequately vetted by the Cell and be provided with the patentability opinions.

2.2 NPS

2.2.1 Shall provide the adequate support like training, conducting workshops, preparing technical patent landscapes, providing patentability opinions to the ideas streaming in the IPR Cell on a regular need basis.

2.2.2 Shall be the teaching faculty for all the engineering students and the faculty at AIPS and promote IPR education within the campus of AIPS.

2.2.3 On a regular basis NPS conducts training, guiding & motivation on IPR by conducting physical classes once a quarter.

2.2.4 NPS shall provide any needed advice or guidance or clarification on IP related matters over any communication means in ordinary scenario.

3. Duration of MoU

The total time-frame of the engagement would be for a period of 5 years from the date of signing this MoU. The term of this MoU may be extended as may be mutually decided by the Parties.

4. Financials

4.1 NPS shall be paid by AIPS on a project-to-project or task basis (e.g. Search, drafting & filing, IP Policy, etc.) on completion of the project or task.

Vanathi Institute of Pharmaceutical Sciences
Plot No. 10, Wallur Road, Phogapuram,
Vizianagaram Dt., - 531162

4.2 In addition, travel allowance for any visits to the campus of first party shall be paid to NPS as and when required during the execution of the duties according to the MOU by AIPS.

5. Intellectual Property Rights

The rights over scientific and technical outputs based on the data and report generated in any study mutually undertaken would vest with both the parties. The Patent and other intellectual rights pertaining to any part of the project shall vest with first Party.

6. Confidentiality

The terms of confidentiality would be in accordance with the NDA that is separately signed and executed between both the parties.

7. AMENDMENTS TO MoU

No amendment of any provision of this MoU or any Addendum shall be effective unless it is in writing and signed by authorized representatives of both Parties hereto.

8. TERMINATION OF MoU

This MoU may be terminated by either of the Parties forth with if the any other Party commits breach of any of the terms hereof and shall have failed to rectify such breach within sixty (60) days of the notice in this behalf having been served on it by the other Party.

IN WITNESS WHEREOF the Parties hereto have signed this MoU on the 28th, April, 2023 mentioned hereinbefore.

INCUBATION CENTRE

IN

AVANTHI INSTITUTE OF PHARMACEUTICAL SCIENCES CHERUKUPALLY (V) BHOGAPURAM (MD) VIZIANAGARAM-531162.

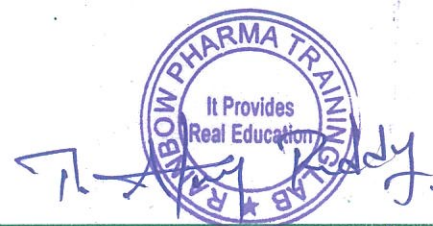

The Primary objective of the incubation centre is to help young budding Pharmacists to develop innovative ideas for taking care of societal needs and to inculcate the innovative thinking nature in the Student's minds. The institution has unique and advanced labs viz., Pharmaceutical Instrumentation Analysis Lab, Advanced Pharmaceutics Lab, Machine Lab, Microbiology Lab, in addition to the regular Curriculum labs. Major strength of the institution includes academically competent, highly qualified and experienced teaching fraternity with an educational background in reputed institutes like NIPER, Andhra university having research paper publications in many reputed journals which are Scopus, Pub med and web of science indexed which decides sound knowledge skills of faculty.

In association with **Rainbow labs, Gajuwaka, Visakhapatnam**, the incubation centre ought to work on advanced functionalities like Computer Aided Drug Design (CADD), bio molecule analysis by using Auto analyzer, method development for molecular design, molecular activity, method validation, molecular modelling, and identification of functional groups basing on detector's absorbance values, estimation of drugs by reverse phase mode by using HPLC, quality control checks for raw materials and biologically relevant compounds by using UV visible spectrophotometer, testing the quality and consistency of drug products and to monitor their stability by using dissolution apparatus and thereby enabling the research-co-ordinators and students to actively involved in industry ready methodological and technological activities.

The following are some of the guidelines to be followed for the establishment / expansion of the existing incubation centre by adding ICT tools, advanced systems data transfer latest to internet (LOI) applications.

Committed for achieving Excellence in Technical Education

HPLC

The students and faculty would work on HPLC quantitative determination of plasma levels of drugs and their metabolites for project and research works respectively. This is of special importance during the development of new drugs and for monitoring therapy. This would be applicable to a much greater variety of mixtures, including non-volatile molecules. This chromatographic techniques used for method development and simultaneous estimation of drugs by reverse phase mode and it would play an important role in finding and isolating the active ingredients, in quality control of raw materials getting from labs. It is one of the choices for analyzing materials the wide range of organic compounds. The sample given by 2nd Party for the evaluation of metabolites.

UV-VISIBLE

UV spectroscopy is an analytical tool to determine the purity of the analyte and it does not undergo decomposition. The qualitative analysis technique is used to perform quality control checks for raw material and biologically relevant compounds such as nucleic acids, DNA, and RNA. UV-visible spectroscopy is used to determine the concentration of a substance in a sample by measuring the absorbance of light at a specific wavelength. It helps to identify the presence of specific functional groups or chromophores in a compound based on characteristics absorption peaks. Faculty and students determine the concentration of active pharmaceutical ingredients in drug formulations, ensuring product quality and consistency. The given sample is analysed by 1st party for further process.

DISSOLUTION APPARATUS

This is helpful in student projects that teaches theory and application by applying for evaluating solid and semi solid dosage forms as well as oral suspensions. It is utilized for testing the quality and consistency of drug products and used to monitor their stability over time, assessing whether changes in storage conditions affect drug release characteristics. It is applied for food and cosmetics, to assess the release of active ingredients from various products. In academic research this is utilized to assess the performance of novel drug formulations and investigate drug release mechanisms. The sample given by 2nd party would be assessed by 1st party.

LAMINAR AIRFLOW (LAF)

Laminar airflow (LAF) refers to the controlled, unidirectional airflow of highly filtered air in a confined area, typically within a laminar flow hood or cabinet. Laminar airflow is crucial in aseptic processing environments, where it provides a sterile workspace for the filling and packaging of pharmaceutical products, ensuring product safety and quality. It is used by faculty for the research purpose to conduct experiments and tests on sensitive materials, where contamination could affect results, and also used to teach students about sterile technique and microbiological procedures, making it a fundamental tool in pharmaceuticals, healthcare, research, and manufacturing.

DISINTEGRATION TEST APPARATUS

Tablet Disintegration testing is crucial to ensure that tablets and capsules break down in to small pieces properly under suitable pH conditions, allowing the active ingredients to be absorbed. It will be used in quality control and formulation development. Chemical reactions often involve the disintegration of molecular bonds to create new compounds or extract desired substances. The given sample is tested for the disintegration process by 1st party.

TABLET PUNCHING MACHINE

It is basically used for making a wide variety of tablets in a uniform shape and different sizes from the different types of materials like powder form and many more. The research Scholars used for testing the physical properties of pharmaceutical active ingredients and excipients. The different formulations often come in tablet form, by utilizing tablet punching machines where it can be coated with multiple layers. Educational institutions and training centres mainly focus to teach students and professionals about tablet manufacturing processes. It will be helpful to create prototype tablets for various experimental and research purposes. The powder form given by the 2nd party would be converted into tablet form by 1st party.

BIOANALYSER

The Bio analyzer system enables rapid, accurate and reproducible analysis of the quality. These instruments typically determine levels of albumin, alkaline phosphatase, aspartate transaminase, blood urea nitrogen, bilirubin, calcium, cholesterol, creatinine, glucose, inorganic phosphorus, proteins and uric acid in blood stream or bodily samples. It would meet the needs of researchers in all areas of analyzing.

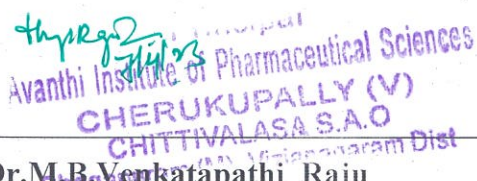

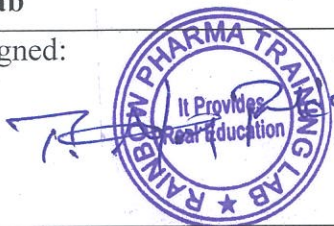

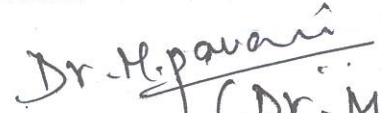

LATEST SMART APPLICATIONS

Latest smart applications like AI tools for drug design, CADD application, SAS application, micromedic software's for the real time developments in drug design and method developments.

In addition to the above, some more applications related to Pharmacy will be added in due course of time for the hands on experience for the utilization of all Specializations of Pharmacy students for the development and presenting innovative thoughts and ideas.
