## 1. SOLAR ENERGY REPORT:

Solar energy report that pertains in our Institute would entail evaluating the energy requirements of the establishment and suggesting a solar energy resolution. Take into account factors such as the solar panels which are implemented for energy usage, and the roof area available for installation, and potential financial advantages. Furthermore, emphasize the environmental advantage. And we installed solar panels on top of roofs with capacity of 200 KW in the month of August 2018.

Harnessing solar power for educational institutions represents a forward-thinking approach that can significantly cut down electricity expenses for colleges. The power plant produces an average of 150 units per day during its operational span of approximately 8 hours.

Additionally, solar power offers the advantage of generating 100% clean and renewable energy, making it an ideal solution for powering various facilities within educational institutions.

Educational institutions typically have ample roof space and open areas that receive abundant sunlight throughout the day, creating an opportune environment for the installation of photovoltaic (PV) systems. This solar energy can be utilized to meet the power demands of lighting, including lamps, fans, and computers. To facilitate this integration, separate wiring paths are designated for light and power circuits, streamlining the incorporation of solar power into the system.

The major power requirements in educational institutions, such as air conditioners, projectors, and heaters, can also benefit from solar energy. Notably, significant savings of up to 50% are achievable when comparing solar energy to traditional electricity sources. This efficiency is particularly pronounced during the months from February to July when the abundance of solar energy, reaching a peak temperature of 42°C, allows the solar panels to operate at their highest efficiency levels. Despite occasional fluctuations due to climate changes and advancements in solar panel technology, the average consumption remains around 150 units, showcasing the reliability and effectiveness of solar power in meeting the energy needs of educational institutions.

The integration of solar energy facilities in our Institute offers a multitude of benefits, promoting sustainability and cost-effectiveness.

### 1. Solar Panels Installation :

Avanthi Institute of Pharmaceutical Sciences can implement solar panels on the roof or available outdoor spaces to harness sunlight and convert it into electricity, reducing once on conventional power sources.

### 2. Energy Generation :

Avanthi Institute of Pharmaceutical Sciences can describe the capacity and efficiency of the solar panels in generating clean and renewable energy to power lighting, equipment, and other electrical needs within the pharmacy.

### 3. Off-Grid Capability :

Avanthi Institute of Pharmaceutical Sciences can highlight the potential for creating an off-grid or partially off-grid pharmacy by incorporating energy storage solutions, such as batteries, to ensure continuous power supply, especially during grid outages.

### 4. Cost Saving:

Avanthi Institute of Pharmaceutical Sciences can emphasize the financial benefits of solar energy, including reduced electricity bills and potential return on investment over time, contributing to long-term cost savings for the pharmacy.

### 5. Environmental Impact :

Avanthi Institute of Pharmaceutical Sciences can discuss the positive environmental impact of using solar energy, reducing the pharmacy's carbon footprint and contributing to the overall sustainability goals of the establishment.

### 6. Grid-Tied Systems :

Avanthi Institute of Pharmaceutical Sciences can explain if the solar energy system is connected to the grid, allowing excess energy generated to be fed back into the grid, potentially earning credits or incentives.

### 7. Maintenance and Monitoring :

Avanthi Institute of Pharmaceutical Sciences can detail the maintenance requirements of the solar panels and any monitoring systems in place to ensure optimal performance and identify

## Energy consumption (2022 – 2023):

**Table: Last 12 months electricity unit consumption and utilization from solar and APEPDCL**

Month - Year	Unit Consumed From APEPDCL(KWh)	Unit Generated By Solar (KWh)	Unit Export To APEPDCL (KWh)
June 2022	16525	278	16248
July 2022	12847	1121	11726
August 2022	9524	2322	7203
September 2022	12982	1335	11647
October 2022	11040	1409	9632
November 2022	13062	1082	11981
December 2022	13202	984	12218
January 2023	9303	4057	5246
February 2023	12093	2252	9841
March 2023	15454	1731	13723
April 2023	16257	766	15491
May 2023	16413	312	15141

Regarding the energy consumption of the year 2022 - 2023 , from the above mentioned table, we find a variation of units which are consumed based upon the climatic conditions. In this point of view, 64 % of solar energy is savable when compared to electricity power. The maximum generation of solar energy is more than 5000 kWh and minimum is 45000kwh but during the months from February to July, as we have excess of solar energy of maximum 42° C , the solar power panels are highly efficient to observe the energy needed for further utilization purpose.

## **2.WHEELING TO GRID:**

### **SOURCES OF ELECTRIC POWER:**

Andhra Pradesh Eastern Power Distribution Corporation Limited distributes power using three transformers, one with a capacity of 100 KVA and two with a capacity of 200 KVA. Additionally, a rooftop solar power plant with a capacity of 200 KW contributes to the energy supply by connecting to the power grid through the 200 KVA transformers in a net metering system.

To ensure a continuous power supply, the system is supported by two diesel generators. One generator has a rating of 62 KVA, while the other has a rating of 32 KVA. These generators act as backup power sources.

Solar energy is widely considered as the most feasible and viable green energy source globally, particularly in tropical countries like India. Its high viability makes it an attractive option for fulfilling energy requirements.

### 3. USE OF LED LAMPS

The use of LED lamps in Avanathi Institute of Pharmaceutical Sciences offers several advantages:

1. **Accurate Lighting for Tasks:** LED lamps in Avanathi Institute of Pharmaceutical Sciences provide precise and focused illumination, ensuring accurate visibility for tasks such as reading prescriptions, compounding medications, and labeling.
2. **Color Rendering:** LEDs in Avanathi Institute of Pharmaceutical Sciences offer high-quality color rendering, allowing pharmacists to distinguish between different medications and ensure accuracy in color-coded information.
3. **Reduced Energy Consumption:** LED lamps in Avanathi Institute of Pharmaceutical Sciences are energy-efficient, leading to lower electricity bills and contributing to sustainable practices within the pharmacy block.
4. **Long Lifespan:** LEDs in Avanathi Institute of Pharmaceutical Sciences have a longer lifespan than traditional lighting, reducing maintenance efforts and costs associated with bulb replacements.
5. **Enhanced Safety:** LED lamps in Avanathi Institute of Pharmaceutical Sciences emit minimal heat, reducing the risk of burns or discomfort during prolonged use. This is particularly important in environments where safety is paramount, such as a pharmacy.
6. **Adaptability to Dimming:** Many LED lamps in Avanathi Institute of Pharmaceutical Sciences are dimmable, allowing for flexibility in adjusting light levels based on specific needs, creating a comfortable and adaptable workspace.
7. Using led lamps in our institution we can save up to 80 percent on energy conversation compared to normal bulbs.
8. These led lamps are placed in different areas like: Seminar hall, auditorium and principal cabin
9. Using led lamps in an Institute is a best choice for energy saving and cost effectiveness and provide better lighting quality.

#### **4. OUTCOME OF ENERGY CONSERVATION:**

1. By implementing energy conservation measures at Avanthi Institute of Pharmaceutical Sciences, the institution can reduce utility bills and save on costs. This can be achieved through the use of energy-efficient lighting, HVAC systems, and appliances.
2. Avanthi Institute of Pharmaceutical Sciences can contribute to environmental sustainability by implementing energy conservation measures. This will help lower the institution's overall carbon footprint, aligning with global efforts to reduce energy consumption and combat climate change.
3. Compliance with energy efficiency regulations and standards is crucial for Avanthi Institute of Pharmaceutical Sciences. By implementing energy conservation measures, the institution can ensure adherence to these regulations, avoiding potential penalties or fines.
4. Demonstrating a commitment to energy conservation and sustainability can enhance the reputation of Avanthi Institute of Pharmaceutical Sciences. This can be particularly attractive to environmentally conscious students, faculty, and stakeholders.
5. Avanthi Institute of Pharmaceutical Sciences can provide educational opportunities for students by integrating energy conservation initiatives into the curriculum. This fosters awareness and understanding of sustainable practices in healthcare settings.
6. Energy-efficient measures, such as improved insulation, ventilation, and lighting design, can contribute to a more comfortable and healthier indoor environment at Avanthi Institute of Pharmaceutical Sciences. This benefits both students and staff, promoting a positive learning and working environment.
